GRAPE VARIETY
✕

MERLOT

Sensitive to the elements, and prone to rot without meticulous management, Merlot is not the easiest varietal to work with. But the winemaker that dedicates the time and care to bringing this grape to life is rewarded with some of the lushest and smoothest wines in the world. Alive with fruitiness and gentle to the palate thanks to weaker tannins and acids, a successfully crafted Merlot does not need too much time in the cellar to mature, but can be enjoyed much sooner than other reds.

resident evil 2 - claire costume elza walker

Was it just me but was this better then the first one?. A fun and addicting little puzzle game. It's not particularly difficult but it can challenge your ability to recognize patterns. The gameplay is simple: make squares\rectangles where all 4 corners are the same color blocks to clear them and gain points.

If you're looking for a simple pick up and play puzzle game akin to bejeweled this might be a good pick for you.. T.G. Hyper Librarian and TG, required for synchro decks.. Played about 15 minutes and really enjoyed it. Creepy, fun, and for the free price tag a nice little experience. To me, you have nothing to lose and everything to gain with a game like this. Definitely suggest you give it a try. Especially if you hate spiders. Why did it have to be a spider!. Though just a bit too pricey for its kind in my opinion, it's one of the nicest RPGs I've seen on Steam, with nice character customization, a variety of weapons, and a lot of nice menu options, such as making a sort of "aid" with your other characters to increase your stats and defense. The only con, is that after a while it feels repetitive, and as such, it's hard to really get through if you feel such. But another plus, is that it always draws me back, and I always love playing it again, even if it's just a silly experience. Naturally, the controls flow well, and make it enjoyable to do everything, and with every citizen on the island, you'll have some nice dialogue, sometimes awkward, other times weird, but always nice. And all the classes are nice too.. I suppose I was spoilt with the later incarnations - this is rather stilted. I cannot really recommend it but on the other hand that's not to say that some might not enjoy it. Awesome game. Its very nice and the only cons it that I cant shoot using buttons.. Short, but pretty cool (and cute).

Survives Hell.

Runs into a panda and dies.

10/10. Don't buy this, it's just a clicker game with extra steps. boring after an hour. Such a fun and awesome game! Soooo wish we'd get a Freedom Force 3 :(Ok I'm fully supporting these devs because this is really the only way that we are likely to get a good football sim on the PC. EA has exclusive deals with NFL and NCAA and will never port to the PC. MS is trying to make exclusive deals with 2K so that they can have sports games exclusive to xb1 and MS10. In addition It looks like MS is trying to start yet again their own distribution network for the PC that will only run on xb1 and MS10.

I don't like this environment where you are being forced to buy a console or upgrade an OS just so you can play games. If you are like me and don't like the way this is going then you need to support indie developers like this who are really trying to make a difference.

With that said I have played this version and it is rough when compared to titles created by EA and 2K. Lets face it those guys have massive resources and they get massive support from the console makers as well. This developer is small with very little recourse and no support from valve which is a shame. If valve and steam want to continue to remain dominant on the PC platform then they need to be supporting projects like these as much as they can.

And If you want a good football sim on the PC then you need to be supporting these guys as well. Even with limited resources this dev has done an outstanding job with what he has had to work with. They will have a 2016 version coming out in July and I have seen the improvements they have made. They are still not where they need or want to be but they are making great progress. If they continue to make the same progress over the next year that they made this past year then they are well on their way to making a really good football sim.

I understand that everyone wants it to have NFL and NCAA teams represented in the game. Well they have that covered in the upcoming version. The devs have opened this game up to Mod support and modders have already added uniforms, graphics, logos and rosters to match both NFL and NCAA teams. So day one you will be able to download that content and play with you favorite team.

Bottom line I am not affiliated with these devs in any way. I did not help with the mods and I did not receive any free software nor would I ask or expect any free copies. I simply want everyone that enjoys playing those other games on the consoles to support these guys. I understand that it may take a few years with the current size of their budget and the size of their dev team. They need our support if they are going to make this game better please consider buying this version and the 2016 version when it's released. You can go to youtube and see the progress they are making.

2 thumbs up to Axis football keep up the good work guys.. GW lemondo <3. Great relaxing puzzle game.. What will it take for the developer to fix online mode? Legit question. Such a great game but I have more disconnects and error crashes than completed games. Can anyone care to fix?. This game has its own charm. In the first moments it seems complicated. Once the player understands the system and style of play, the game will reward him with a beautiful experience. The player is continuously amazed and gradually discovers new possibilities. I like that player does not play by the hand, but after a few moments, is able to move the story forward. Whole game is graphically beautifully crafted, audio as well. For the whole game I met with no problem.. Hmm, let's see here.

"An original mechanic on doing damage to enemies." The mechanic literally consists of putting your mouse on a dude and clicking, so yeah, not a very original damage mechanic. Plus, it's just not very fun, it's no better than a cheap sidescroller shooter on Newgrounds that are more fun than this.

I will admit though, the very basic art style is very nice looking with blood splattered everywhere. Plus, a game where you kick zombie♥♥♥♥♥while travelling down a hotel sounds like great fun, but JUST NOT THIS!. If like me you are a fan of hidden object games, this is great also good story line.
